Due to poor water service in pervious years to date. That improvements made at this time would give us the quality of water and service that are long over due. Therefor no rate increases should take place at this time. We have paid for services not rendered. Water that smells like sewage, most of us are not consuming. We pay for water twice, first from our faucets and second from bottled water or filtering. Also the leaks, the breaks, and seepage on our property as well as our neighbors property. I purpose a delay in any increase of billing for water usage at this time. We deserve to be compensated.

Sincerely Yours

Yvonne Ross
